

Air Scour Blower

150 HP Continental Motor

Continental Model 77.05

Case Study Details

The Red Deer Water Treatment Plant required a multistage centrifugal blower, for their air scour lateral system. H2Flow Equipment supplied a 150 HP Continental Blower, to provide 3000 scfm at 6 psi. Continental Blower provided a complete blower package; including a Model 77.05 blower, baseplate, 150 HP TEFC motor, check valves, expansion joints, silencers, valves, pressure gauges and a NEMA 12 local control panel.
